

KTH Racing is one of Sweden's biggest racing teams and if you choose to support us you will get in contact with around 50 students who all have well documented abilities within their studying field. We offer all of our partners the following:

- The opportunity to meet and interact with all the team members. This can be done as company presentations, various events and many other things.
- Exposure of company logotype on the car, the website and the team clothing. The logotype will be seen on at least two major Swedish motorsport fairs each year, technical fairs and of course during the competitions in England and Germany.
- The opportunity to borrow the car for display at various company activities. Main sponsors are also offered to test drive the car when the season is over.
- And if your company has other ideas we are always flexible and will do our best to try to meet your desires!

If you decide to support us, please contact any of our Senior Designers or our Project Manager for more info.

I hope you choose to be a part of our successful Formula!
